Introduction: origins, evolution and metamorphoses of economics imperialism, or the need for an interdisciplinary research programme on human behaviour

1

PART I

At the roots of economics imperialism: classical and neoclassical economics and the issue of primitive societies

9

1 The distant origins of economics imperialism: classical economists and primitive societies

11

1.1 Travellers, philosophers and the savages 11

1.2 Adam Smith: a conjectural primitive economy, or the model of the "early and rude state of society" 28

1.3 In "the realm of necessity": Karl Marx's theory of pre-capitalist societies 36

2 Economics imperialism revealed: neoclassical economists and primitive man

53

2.1 Occupy anthropology: Lionel Robbins, Raymond Firth and the formalist school 53

2.2 Beyond the formalist approach: Clifford Geertz's and Richard Posner's informational approach for peasant and primitive societies 67

2.3 Beyond the formalist approach: Jack Hirshleifer's bioeconomics and the human behavioural ecology of primitive economies 75

- 3 Primitive societies in the interpretation of classical and neoclassical economics: a common model 86

PART II

Economics and the challenge of primitive societies: anthropological non-formalist approaches 89

- 4 The primitive system of gift exchange discovered: Marcel Mauss's *Essai sur le don* 91

4.1 Anthropologists and 'real' primitive economies 91

4.2 Mauss's *Essai sur le don* 93

4.3 Mauss's critique of the homo oeconomicus 100

- 5 The substantivist perspective on the role of the economy in societies: Karl Polanyi's and Marshall Sahlins's contributions 103

5.1 Karl Polanyi's substantivism 103

5.2 Marshall Sahlins's neo-substantivism 110

5.3 The debate on Stone Age Economics in the 1980s and 1990s 120

- 6 The intelligibility of primitive economic organization: Sahlins, Lévi-Strauss and Clastres on Mauss's political philosophy 127

6.1 Claude Lévi-Strauss and Marshall Sahlins on the primitive social contract 127

6.2 Pierre Clastres on the relationship between war and gift exchange in societies "against the state" 129

6.3 Primitive economic organization in the light of Mauss's political philosophy 131

PART III

The problem of the 'other': economics and unselfish behaviour 133

- 7 Economics on altruism, giving and reciprocity 135

7.1 From philanthropy to altruism 135

7.2 Richard Titmuss's *The Gift Relationship and economists' embarrassment* 138

7.3 *Mainstream economics and the gift* 145

7.4 *The economics of reciprocity* 152

A note on the origins of human cooperation: Samuel Bowles
and Herbert Gintis on primitive societies 156

8 A unified framework for behavioural sciences?

On Herbert Gintis's proposal

158

8.1 *How to remedy the "scandalous" pluralism of
social sciences* 158

8.2 *The socio(bio)logy of homo socialis* 162

PART IV

The theoretical and practical relevance of Mauss's gift to the development of a non-imperialist economics

169

9 The gift in social sciences

171

9.1 *Jacques Derrida's philosophy of the impossibility
of the (modern) gift* 171

9.2 *Alvin Gouldner's sociology: the norm of reciprocity
and the principle of 'something for nothing'* 173

9.3 *On Mauss again: anthropology in the 1980s
and 1990s* 176

10 Mauss's research programme revisited: the *Mouvement anti-utilitariste dans les sciences sociales (MAUSS)*

180

10.1 *Utilitarianism and anti-utilitarianism* 180

10.2 *The gift as a new paradigm for social sciences* 182

11 A new Maussian perspective in economics

184

11.1 *On complexity and economics* 184

11.2 *Back to the future with Mauss* 186

Conclusions: the myth of economics imperialism and the possibility of a non-imperialist economics

190
