

Contents

1	Outline	1
2	Bank Management and Steering	3
2.1	Strategy Planning: Iterative Process	3
2.1.1	Process of Planning	3
2.1.2	Capital Allocation	8
2.2	Strategy Planning: Tools	9
2.2.1	EaR/CaR: Overall Aggregation	9
2.2.2	Scenario-Based Assessment/Stress Testing	13
2.3	Capital Optimization	23
3	Banks and the Regulatory and Economic Environment	25
3.1	Economic and Political Aspects	25
3.2	Types of Banks	26
3.3	Banks in Different Legislations	27
3.4	Role of the Banks' Credit Rating	27
3.5	Role of Rating Agencies	28
3.6	Role of the International Swaps and Derivatives Association (ISDA)	28
3.7	Regulatory Environment	29
3.7.1	BIS	29
3.7.2	BIS and the Great Depression: History in a Nutshell	29
3.8	Basel III	30
3.8.1	Basel III: Philosophy and Evolvment	30
3.8.2	Basel III: Timeline and Implementation Status	32
3.8.3	Basel III: Some Spotlights	32
3.8.4	Basel III: Capital Ratio	34
3.8.5	Basel III: Output Floor	34
3.9	Issue Overview	35

3.10	Issue Complexity and Risk Identification	36
3.10.1	Sale and Leaseback Transactions	36
3.10.2	Securitization and Subprime	36
4	Risk Modeling and Capital: Credit Risk (Loans)	39
4.1	Pricing and Expected Loss	39
4.1.1	Adverse Selection	40
4.1.2	Risk Adjusted Pricing and RoE	41
4.2	Loan Loss Provisioning	42
4.3	Capital: Relevant Points	42
4.3.1	Default Definition	43
4.3.2	Maturity	44
4.3.3	Granularity of Rating Engines	46
4.3.4	Classification of Exposures as Retail or Corporate	47
4.3.5	Recent Bubbles	49
4.3.6	Missing Values	50
4.4	PD-Rating Tools, LGD Tools, and EAD Estimations	51
4.5	Advanced Regulatory Approaches	51
4.6	Rating Tools (PD Models)	52
4.6.1	Development of Rating Tools	52
4.6.2	Calibration of the Rating Tools	55
4.6.3	Example of a Corporate Rating Tool	57
4.7	LGD Models (LGD Tools)	58
4.7.1	LGD Tool for Vehicles/Machinery	60
4.7.2	LGD Tool for Mortgages	62
4.8	Backtesting Within Credit Risk	65
4.8.1	Backtesting Versus Validation	65
4.8.2	Backtesting	65
4.8.3	Backtesting Framework PD	66
4.8.4	Backtesting Framework LGD	68
5	Risk Modeling and Capital: Counterparty Credit Risk ("EPE" and "CVA")	71
5.1	Cash Flows, Exposure, Pricing, and Capital	71
5.1.1	"EPE" Capital Modeling/Capital Charge	72
5.1.2	CVA Capital Charge	74
5.2	Wrong Way Risk	76
6	Risk Modeling and Capital: Credit Risk (Securitizations)	79
6.1	Basel III Approaches: Securitization-Related Capital	79
6.2	History: Financial Crisis of 2007	80
7	Risk Modeling and Capital: Market Risk	81
7.1	Pricing	81
7.2	Capital: Internal Models Approach	81
7.3	P&L Attribution Testing: Internal Models Approach	83
7.4	Capital: Standardized Approach	83

7.5	History: Basel 2.5	84
7.6	Exposure Modeling (Pricing and Capital): Interest Rate Derivatives	85
7.6.1	Monte Carlo Simulation	85
7.6.2	Market Data: Caps	86
7.6.3	Fitting of Volatility Curves to the Data	86
7.6.4	Correlations: Setting	87
7.6.5	Longstaff-Schwartz Regression	87
7.7	Backtesting	88
8	Risk Modeling and Capital: Operational Risk	89
8.1	Standardized Measurement Approach	89
8.1.1	Business Indicator Component of the SMA	90
8.1.2	Loss Component (ILM) of the SMA	90
8.1.3	Loss Event Taxonomy (Categories) for SMA (and Other Approaches)	90
8.2	AMA Model (Pillar II): Modeling and Simulation	93
8.3	Internal Data/External Data	101
8.4	Controls	102
8.5	Cost/Benefit Considerations for Controls	103
8.6	Backtesting	104
9	Risk Modeling: Asset Liability Management	105
9.1	Liquidity Coverage Ratio	105
9.2	Net Stable Funding Ratio	106
Appendix A:	A-IRB Formulas for the Derivation of Capital	109
A.1	Residential Mortgage Exposure	109
A.2	Qualifying Revolving Retail Exposures	110
A.3	Other Retail	110
A.4	Corporates and Bank Exposures	110
A.5	Big Banks and Financial Institutions	111
A.6	Corporate: SME	111
Appendix B:	Credit Portfolio Modeling	113
Appendix C:	Country Risk/Issuer Risk	115
Appendix D:	Settlement Risk	117
Appendix E:	Historical Data	119
Appendix F:	Specialized Lending/Project Finance	123
