

Contents

1	The Agile Way	1
1.1	Introduction: Adjustment for Agility	1
1.2	What Is Agility?	2
1.3	The Story of Russian Bridges	8
1.3.1	Why Is the Number of Bridges so Small in Russia?	8
1.3.2	Bridge Collapses in Russia	10
1.3.3	Building the Kerch Bridge in Crimea	11
1.4	Digital Transformation	11
1.4.1	Transparent Voting Platform Based on Blockchain	11
1.4.2	Decentralized Applications	16
1.5	Architecting for Agility	17
1.5.1	Sentiment Analysis System Based on Events Feedback	17
1.6	Conclusion: How Agile Way Works	27
	References	28
2	Agile Languages	35
2.1	Introduction: Communication Agility	35
2.2	Why Languages?	36
2.3	Making Processes Communicate	40
2.4	Developing an Embedded System	54
2.5	Conclusion: How Languages Work	62
	References	63
3	Agile Services	65
3.1	Introduction: What Is an Agile Service?	65
3.2	The Microservice Approach	67
3.3	Enterprise Microservices	71
3.4	Bank Microservices	82
3.5	CRM Microservices	87
3.5.1	Analysis of Existing Solutions	89

3.6	Cloud Services	90
3.6.1	Process Modeling for Virtual Machines in Clouds	90
3.6.2	Information Process Model	92
3.6.3	Optimization of Virtual Machine Configuration	95
3.6.4	Experimental Design of Automatic Virtual Machine Configuration	97
3.6.5	Conditions, Objects and Order of Testing	98
3.6.6	Analysis of Testing Results	101
3.7	Conclusion: How Services Work	103
	References	104
4	Agile Patterns and Practices	107
4.1	Introduction: Why Agile Patterns and Practices?	107
4.2	Agile Knowledge Transfer	108
4.3	Open Education Metadata Warehouse	118
4.4	Aircraft Communication System	125
4.5	Conclusion: How Patterns and Practices Work	132
	References	133
	Conclusion: Agility Revisited: What, Why and How	135
	Glossary	139
	Index	151
