<i>Preface</i>	v
<i>Author's Biography</i>	vii
<i>Acronyms</i>	ix
<b>1. Demand Estimation for Differentiated-product Markets</b>	<b>1</b>
1.1 Why Demand Analysis/Estimation? . . . . .	1
1.2 Review: Demand Estimation . . . . .	2
1.2.1 "Traditional" approach to demand estimation . . . . .	3
1.3 Discrete-choice Approach to Modeling Demand . . . . .	4
1.4 Berry (1994) Approach to Estimate Demand in Differentiated Product Markets . . . . .	8
1.4.1 Measuring market power: Recovering markups . . . . .	14
1.4.2 Estimating cost function parameters . . . . .	16
1.5 Berry, Levinsohn, and Pakes (1995): Demand Estimation Using Random-coefficients Logit Model . . . . .	17
1.5.1 Simulating the integral in Eq. (1.4) . . . . .	21
1.6 Applications . . . . .	22

1.7	Additional Details: General Presentation of Random Utility Models . . . . .	24
	Bibliography . . . . .	26
<b>2.</b>	<b>Single-agent Dynamic Models: Part 1</b>	<b>29</b>
2.1	Rust (1987) . . . . .	29
2.1.1	Behavioral model . . . . .	29
2.1.2	Econometric model . . . . .	33
	Bibliography . . . . .	38
<b>3.</b>	<b>Single-agent Dynamic Models: Part 2</b>	<b>39</b>
3.1	Alternative Estimation Approaches: Estimating Dynamic Optimization Models Without Numeric Dynamic Programming . . . . .	39
3.1.1	Notation: Hats and Tildes . . . . .	40
3.1.2	Estimation: Match Hats to Tildes . . . . .	43
3.1.3	A further shortcut in the discrete state case . . . . .	43
3.2	Semiparametric Identification of DDC Models . . . . .	46
3.3	Appendix: A Result for MNL Model . . . . .	50
3.4	Appendix: Relations Between Different Value Function Notions . . . . .	52
	Bibliography . . . . .	53
<b>4.</b>	<b>Single-agent Dynamic Models: Part 3</b>	<b>55</b>
4.1	Model with Persistence in Unobservables ("Unobserved State Variables") . . . . .	55
4.1.1	Example: Pakes (1986) patent renewal model . . . . .	55
4.1.2	Estimation: Likelihood function and simulation . . . . .	58
4.1.3	"Crude" frequency simulator: Naive approach . . . . .	59
4.1.4	Importance sampling approach: Particle filtering . . . . .	60

4.1.5	Nonparametric identification of Markovian Dynamic Discrete Choice (DDC) models with unobserved state variables . . . . .	64
	Bibliography . . . . .	71
<b>5.</b>	<b>Dynamic Games</b>	<b>73</b>
5.1	Econometrics of Dynamic Oligopoly Models . . . . .	73
5.2	Theoretical Features . . . . .	74
5.2.1	Computation of dynamic equilibrium . . . . .	76
5.3	Games with "Incomplete Information" . . . . .	77
	Bibliography . . . . .	79
<b>6.</b>	<b>Auction Models</b>	<b>81</b>
6.1	Parametric Estimation: Laffont–Ossard–Vuong (1995) . . . . .	81
6.2	Nonparametric Estimation: Guerre–Perrigne–Vuong (2000) . . . . .	85
6.3	Affiliated Values Models . . . . .	88
6.3.1	Affiliated PV models . . . . .	88
6.3.2	Common value models: Testing between CV and PV . . . . .	90
6.4	Haile–Tamer's "Incomplete" Model of English Auctions . . . . .	92
	Bibliography . . . . .	94
<b>7.</b>	<b>Partial Identification in Structural Models</b>	<b>95</b>
7.1	Entry Games with Structural Errors . . . . .	96
7.1.1	Deriving moment inequalities . . . . .	98
7.2	Entry Games with Expectational Errors . . . . .	99
7.3	Inference Procedures with Moment Inequalities/ Incomplete Models . . . . .	100
7.3.1	Identified parameter vs. identified set . . . . .	100
7.3.2	Confidence sets which cover "identified parameters" . . . . .	101

7.3.3	Confidence sets which cover the identified set . . . . .	103
7.4	Random Set Approach . . . . .	105
7.4.1	Application: Sharp identified region for games with multiple equilibria . . . . .	106
	Bibliography . . . . .	107
<b>8.</b>	<b>Background: Simulation Methods</b>	<b>109</b>
8.1	Importance Sampling . . . . .	110
8.1.1	GHK simulator: Get draws from truncated multivariate normal (MVN) distribution . . . . .	110
8.1.2	Monte Carlo integration using the GHK simulator . . . . .	113
8.1.3	Integrating over truncated (conditional) distribution $F(\vec{x} \vec{a} < \vec{x} < \vec{b})$ . . . . .	114
8.2	Markov Chain Monte Carlo (MCMC) Simulation . . . . .	115
8.2.1	Background: First-order Markov chains . . . . .	116
8.2.2	Metropolis–Hastings approach . . . . .	117
8.2.3	Application to Bayesian posterior inference . . . . .	120
	Bibliography . . . . .	121
<b>9.</b>	<b>Problem Sets</b>	<b>123</b>
	Bibliography . . . . .	134
	<b>Index</b>	<b>135</b>
